

Door Panels

BUG SEDAN & CONVERTIBLE

Why TMI Door Panels?

It's worth checking to know if your new Door Panel uses cardboard or masonite wood panels. Cardboard can bend easily, and may deform, especially when dampened by rain or snow. Even cleaning sprays working in around the edges can begin the deterioration process. TMI only uses masonite wood backing. Wood is the ultimate in lasting quality. Extremely rigid, durable, and unaffected by moisture, they last and look new longer!

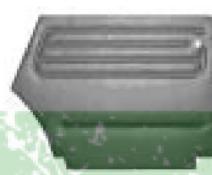

If you demand an exact match to Factory Embossing ...your only choice is TMI. Our door panels are embossed with a tool made from the ORIGINAL Volkswagen door panel! They look great!

Headliners

BUG SEDAN

Why TMI Headliners?

It's the stitching that's the key. When it rots and stretches, down comes the headliner. TMI uses anti-microbial treated thread which resists mildew and rot, but more importantly... our Headliners remain tight and stay up. We manufacture both cloth and vinyl headliners.

INSTALLATION TIP:

- Use TMI's Contact Spray Adhesive
- Purchase a hot melt glue gun

Easy Installation Headliner
Simplifies the installation procedure around rear window sections, eliminating hassles of multi-piece headliners. It's a snap to install!

Easy Installation Headliner

Bug Sedan 1949-1977

Why TMI Sunvisors?

TMI is the only manufacturer to use the Jersey Spring Clip mechanism, which allows exact positioning of the Sunvisor. It won't drop and remains tight... you can feel the quality as you rotate it into place.

Why TMI Convertible Tops?

We use the same materials as Mercedes-Benz for superior stain and fade resistance. Each top is precision cut to a 30 thousandths tolerance, cross-cut, and RF Heat Sealed to stop shrinking and provide a tight, no flap, weather fit. It all adds up to an exact fit to the frame structure.

Why TMI Padding Kits?

A must when replacing VW convertible tops. Our padding is made from the original VW patterns.

Why TMI Carpet?

Thick 1/4" pile height and 250 count weave carpet with FLW Backing make TMI carpet better. The 250 count weave gives the carpet superior wear and stain resistance. Our exclusive FLW Backing is the ultimate way to hold the weave in place and resists fraying or separation. Easy to install, cut-outs are provided.

Spray Adhesive
Carpet foam
and fabric
spray adhesive.
Ozone safe.
#34-9102

Heatshield Pad

It's a good idea to install TMI's Heatshield Pad before installing new carpet. 4'x6'.

Why TMI Upholstery?

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.

TMI's Slip-On upholstery is very easy to install. Simply pull over your old, existing upholstery and "SNAPPO", your Bug has a new, refreshing interior face-lift!

Why TMI Door Panels?

It's worth checking to know if your new Door Panel uses cardboard or masonite wood panels. Cardboard can bend easily, and may deform, especially when dampened by rain or snow. Even cleaning sprays working in around the edges can begin the deterioration process. TMI only uses masonite wood backing. Wood is the ultimate in lasting quality. Extremely rigid, durable, and unaffected by moisture, they last and look new longer!

If you demand an exact match to Factory Embossing ...your only choice is TMI. Our

door panels are embossed with a tool made from the ORIGINAL Volkswagen door panel! They look great!

Why TMI Headliners?

It's the stitching that's the key. When it rots and stretches, down comes the headliner. TMI uses anti-microbial treated thread which resists mildew and rot, but more importantly... our Headliners remain tight and stay up. We manufacture both cloth and vinyl headliners.

Header Bow Cover

Sunvisors

GHIA SEDAN & CONVERTIBLE

Why TMI Sunvisors?

TMI is the only manufacturer to use the Jersey Spring Clip mechanism, which allows exact positioning of the Sunvisor. It won't drop and remains tight... you can feel the quality as you rotate it into place.

Convertible Tops

GHIA SEDAN & CONVERTIBLE

Why TMI Convertible Tops?

We use the same materials as Mercedes-Benz for superior stain and fade resistance. Each top is precision cut to a 30 thousandths tolerance, cross-cut, and RF Heat Sealed to stop shrinking and provide a tight, no flap, weather fit. It all adds up to an exact fit to the frame structure.

Standard consoles are available in one solid color or two-tone, and are manufactured to fit cars with modified shifters.

Standard Console #25-1509

Carpet Kits

GHIA SEDAN & CONVERTIBLE

Why TMI Carpet?

Thick 1/4" pile height and 250 count weave with FLW Backing make TMI carpet better. The 250 count weave gives the carpet superior wear and stain resistance. Our exclusive FLW Backing is the ultimate way to hold the weave in place and resists fraying or separation. Easy to install, cut-outs are provided.

Seat Upholstery

GHIA SEDAN & CONVERTIBLE

GHIA

SEDAN
AND
CONV.

Why TMI Upholstery?

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.

Why TMI Door Panels?

It's worth checking to know if your new Door Panel uses cardboard or masonite wood panels. Cardboard can bend easily, and may deform, especially when dampened by rain or snow. Even cleaning sprays working in around the edges can begin the deterioration process. TMI only uses

masonite wood backing. Wood is the ultimate in lasting quality. Extremely rigid, durable, and unaffected by moisture, they last and look new longer!

If you demand an exact match to Factory Embossing ...your only choice is TMI. Our

door panels are embossed with a tool made from the ORIGINAL Volkswagen door panel! They look great!

Visor Clips #21-2018

Why TMI Headliners?

It's the stitching that's the key. When it rots and stretches, down comes the headliner. TMI uses anti-microbial treated thread which resists mildew and rot, but more importantly... our Headliners remain tight and stay up. We manufacture both cloth and vinyl headliners.

BUS

Why TMI Sunvisors?

TMI is the only manufacturer to use the Jersey Spring Clip mechanism, which allows exact positioning of the Sunvisor. It won't drop and remains tight... you can feel the quality as you rotate it into the place.

Center Console • Carpet Kits

BUS

Why TMI Consoles?

Precise fit, and perfect color match make these a quality addition to your Volkswagen.

Carpet Kits

BUS

Why TMI Carpet?

Thick 1/4" pile height and 250 count weave with FLW Backing make TMI carpet better. The 250 count weave gives the carpet superior wear and stain resistance. Our exclusive FLW Backing is the ultimate way to hold the weave in place and resists fraying or separation. Easy to install, cut-outs are provided.

Why TMI Upholstery?

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.

Door Panels

TYPE III

Why TMI

Door

Panels?

It's worth checking to know if your new Door Panel uses cardboard or masonite wood panels. Cardboard can bend easily, and may deform, especially when dampened by rain or snow.

Even cleaning sprays working in around the edges can begin the deterioration process. TMI only uses masonite wood backing. Wood is the ultimate in lasting quality. Extremely rigid, durable, and unaffected by moisture, they last and look new longer!

If you demand an exact match to Factory Embossing ...your only choice is TMI. Our door panels are embossed with a tool made from the ORIGINAL Volkswagen door panel! They look great!

Visor Clips #21-2019

Why TMI Headliners?

It's the stitching that's the key. When it rots and stretches, down comes the headliner. TMI uses anti-microbial treated thread which resists mildew and rot, but more importantly... our Headliners remain tight and stay up. We manufacture both cloth and vinyl headliners.

TYPE III

Why TMI Sunvisors?

TMI is the only manufacturer to use the J.S.C. mechanism, which allows exact positioning of the Sunvisor. It won't drop and remains tight... you can feel the quality as you rotate it into the place.

Standard Console

Type III 1961-1974

| | |
|---------|------------------------------|
| 25-3011 | '61-70 Square/Fast/Notchback |
| 25-3012 | '71-72 Square/Fast/Notchback |
| 25-3013 | '73-74 Square/Fast/Notchback |

Must have stock radio attachment in place

Standard consoles are available in one solid color or two-tone, and are manufactured to fit cars with modified shifters.

Carpet Kits

TYPE III

Why TMI Carpet?

Thick 1/4" pile height and 250 count weave with FLW Backing make TMI carpet better. The 250 count weave gives the carpet superior wear and stain resistance. Our exclusive FLW Backing is the ultimate way to hold the weave in place and resists fraying or separation. Easy to install, cut-outs are provided.

Seat Upholstery

TYPE III

Why TMI Upholstery?

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.

Seat Construction Guide

Why TMI Upholstery?

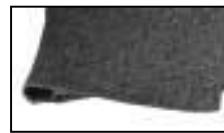

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.

Door Panels

RABBIT, CABRIOLET, GOLF, SCIROCCO, JETTA

Why TMI Door Panels?

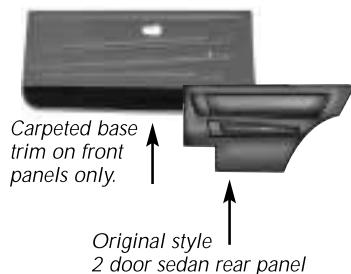

It's worth checking to know if your new Door Panel uses cardboard or masonite wood panels. Cardboard can bend easily, and may deform, especially when dampened by rain or snow.

Even cleaning sprays working in around the edges can begin the deterioration process. TMI only uses masonite wood backing. Wood is the ultimate in lasting quality.

Extremely rigid, durable, and unaffected by moisture, they last and look new longer!

If you demand an exact match to Factory Embossing ...your only choice is TMI. Our door panels are embossed with a tool made from the ORIGINAL Volkswagen door panel! They look great!

Why TMI Headliners?

It's the stitching that's the key. When it rots and stretches, down comes the headliner. TMI uses anti-microbial treated thread which resists mildew and rot, but more importantly... our Headliners remain tight and stay up. We manufacture both cloth and vinyl headliners.

Why TMI Convertible Tops?

We use the same materials as Mercedes-Benz for superior stain and fade resistance. Each top is precision cut to a 30 thousandths tolerance, cross-cut, and RF Heat

Sealed to stop shrinking and provide a tight, no flap, weather fit. It all adds up to an exact fit to the frame structure.

Why TMI Upholstery?

All TMI products feature EXACT and AUTHENTIC colors, which makes matching OEM or TMI colors easy and accurate. Plus, future additions blend in perfectly. Some brands always seem to be a shade different, even when you think you're buying the right color. Mismatched colors look cheap and not very professional...why settle for "close" when you can have EXACT from TMI?

The "piping" (also known as Welt) on seats and door panels can be made two ways, Extruded or Wrapped. TMI's Extruded method produces piping made of solid color, that is 23 times thicker than a vinyl wrapped cord. No matter how much wear you give Extruded Piping, it never shows the cord or white string like wrapped cord will show.
